

NEW FOR 2014

SP Cruiser Mark II

MASTER FORWARD STATEROOM

The Mark II version of the award-winning SP Cruiser® now features a larger aft cockpit, additional seating in the main saloon, a new Solent rig for enhanced sailing performance and numerous upgrades to interior appointments. Year round boating comfort, trawler-like livability and motoring performance, simple push button sailing and legendary Island Packet quality and value make this popular yacht even more desirable. Among many unique features are the SP Cruiser's twin cockpits; one aft, perfect for the morning's first cup of coffee, plus one forward for enjoying being aboard underway or at anchor.

Large CE Category "A – Ocean" rated opening windows in the enclosed deckhouse offer panoramic views, while the center windshield panel hinges upward to allow socializing with family and friends in the forward cockpit. Control of this vessel is made easy and comfortable from the forward facing helm bench seat that reverses for dining or socializing, a large console forward of the wheel for engine controls and instrumentation, and push button controls for sail trim which are accessible from the helm and both forward and aft cockpits. An optional remote autopilot control is available that gives you the ability to steer the boat from virtually any location aboard. And with the reversible helm seat, the movable bench seat brought in from the aft cockpit and the L-shaped settee surrounding the folding table, the deckhouse becomes a wonderful spot to have a meal or play a game of cards... regardless of what the weather may be doing outside.

Walk thru-transom door leads to large stern platform complete with pull-out swim ladder

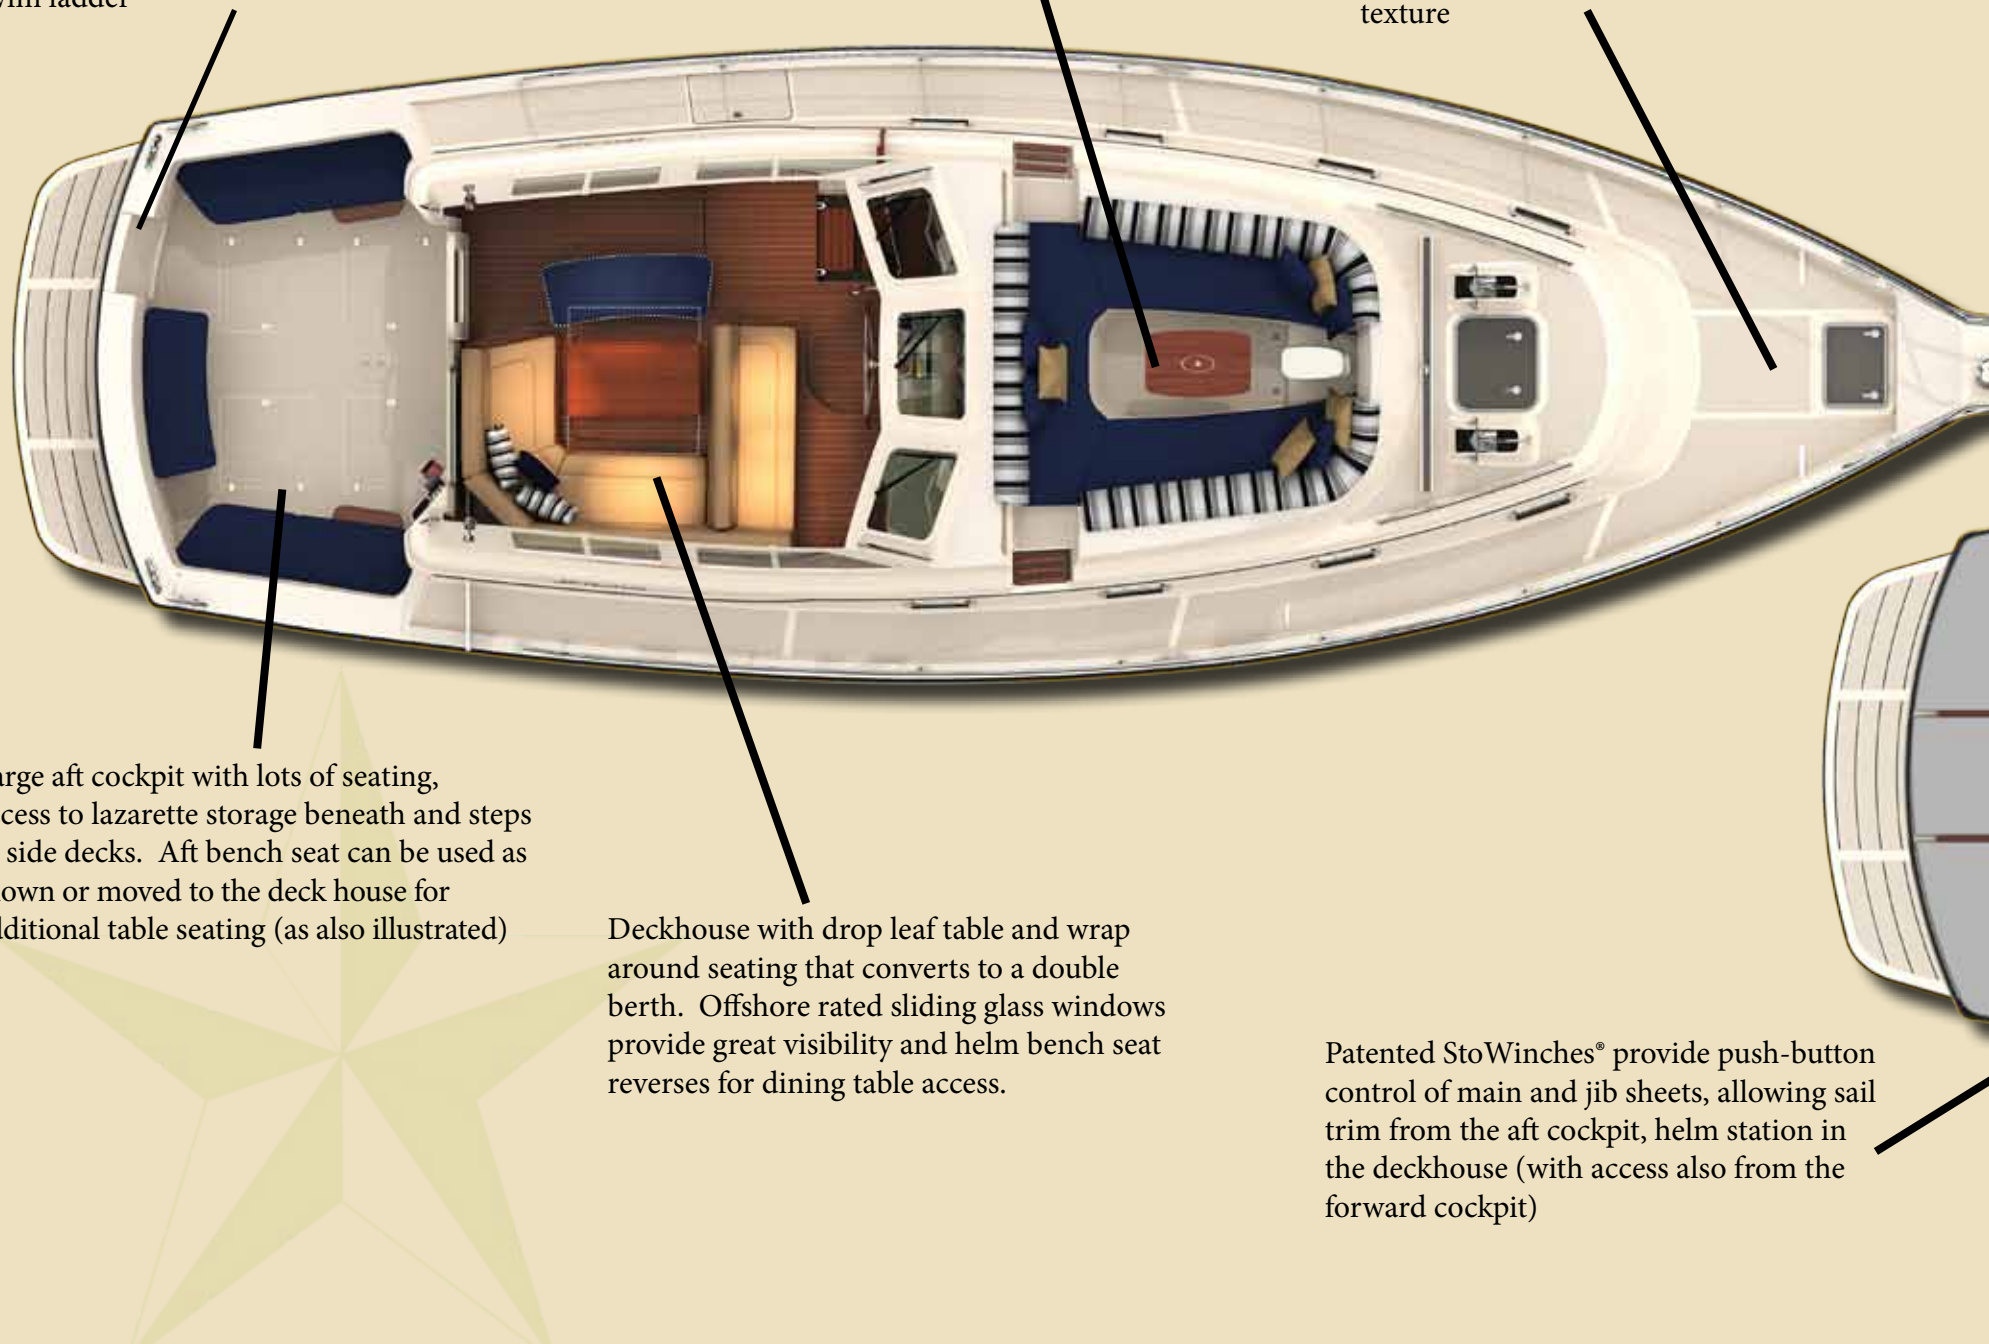

Forward cockpit offers an inviting social area with great visibility, access to sail controls and a removable table for "al fresco" dining. Contoured backrest cockpit cushions available

Wide recessed foredeck with anchor locker access, patented SeaSafe® anchor roller and premium diamond pattern slip-resistant texture

Large aft cockpit with lots of seating, access to lazarette storage beneath and steps to side decks. Aft bench seat can be used as shown or moved to the deck house for additional table seating (as also illustrated)

Deckhouse with drop leaf table and wrap around seating that converts to a double berth. Offshore rated sliding glass windows provide great visibility and helm bench seat reverses for dining table access.

Patented StoWinches® provide push-button control of main and jib sheets, allowing sail trim from the aft cockpit, helm station in the deckhouse (with access also from the forward cockpit)

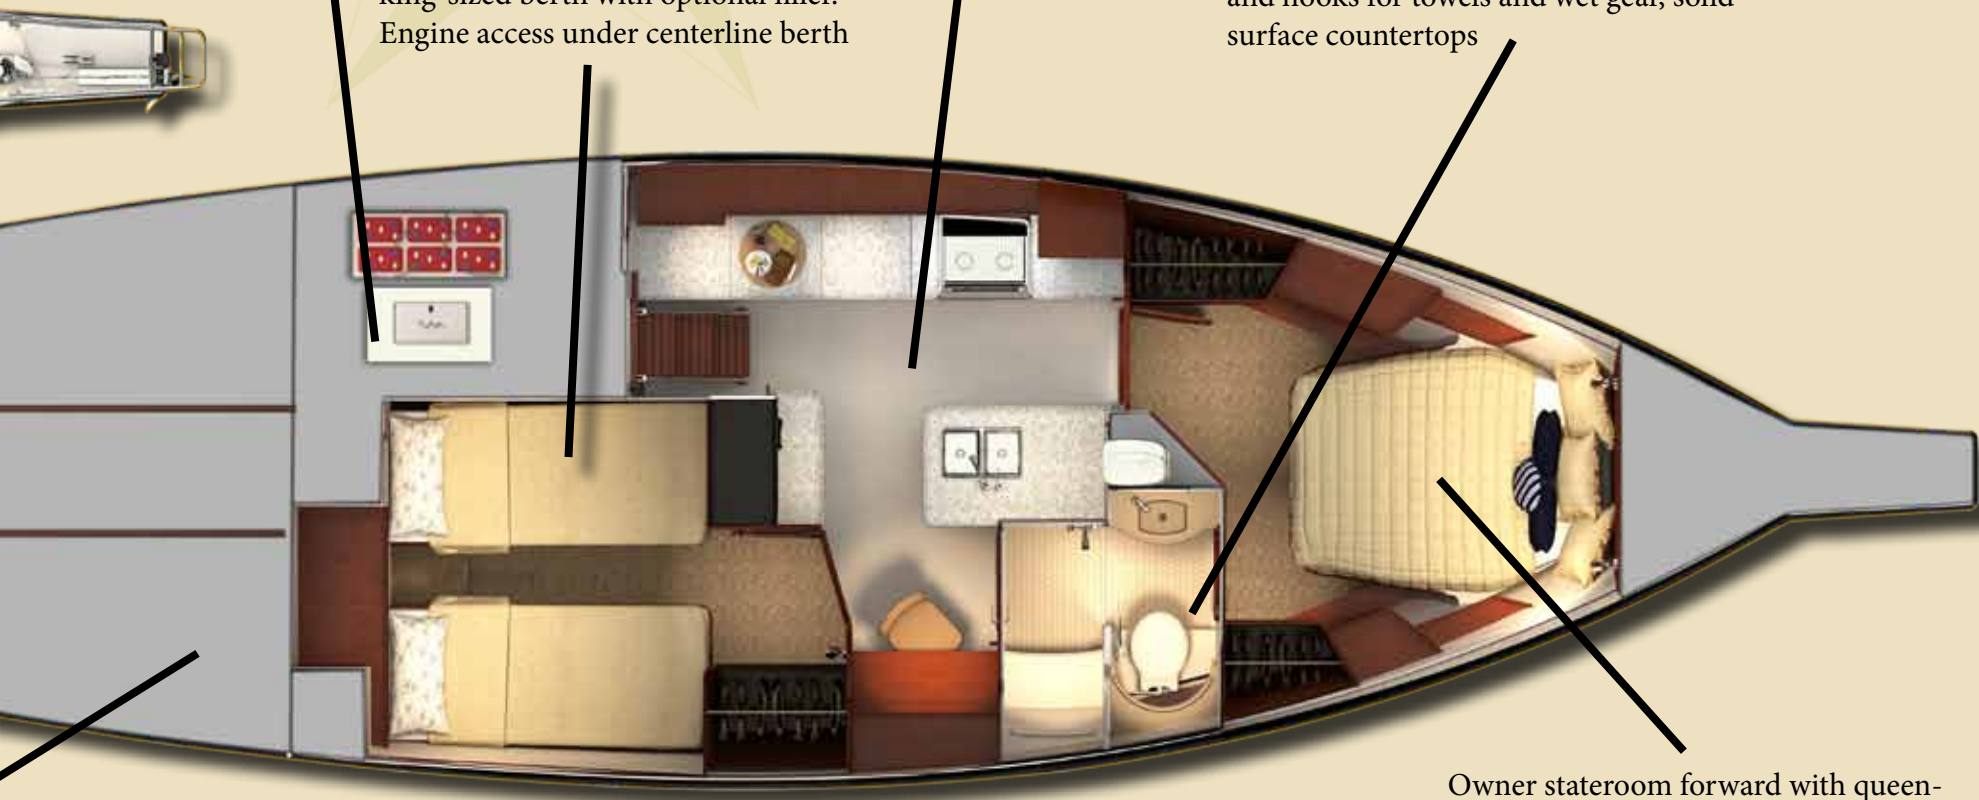

Machinery space below deck house sole for batteries, one of two water tanks, (optional) genset, water maker or a host of other factory/dealer or owner installed equipment choices

Large walk through galley with generous refrigerator and freezer compartments, LPG stove and microwave oven. Center-line island with double sinks, solid surface countertops

Twin aft cabin berths easily convert to a king-sized berth with optional filler. Engine access under centerline berth

Head with fore and aft access. Separate shower stall, electric, fresh water flush head and hooks for towels and wet gear, solid surface countertops

Owner stateroom forward with queen-sized berth, two hanging lockers and ample locker storage

AWARD WINNING LEGACY

STOWINCH SAIL CONTROLS

Entering the pilothouse, you are completely overwhelmed by the bright interior... with plentiful headroom, lots of interior volume, great visibility and (believe it or not) easy handling both sailing and under power. It's amazing how well you can trim and feel this boat from inside. It handles really well.
